

# Jefferson County Missouri Security Officer Temporary License Regulations

A temporary license may be issued by the Private Security Division of the Jefferson County Sheriff's Office, which permits the bearer to work for a limited period, pending completion of their required training and the issuance of a permanent license. Training must be completed within ninety (90) days of the issuance of a temporary license.

The following regulations/restrictions apply:

1. A holder of a temporary license is prohibited from carrying a firearm or protective device.
2. A holder of temporary license has NO POWER OF ARREST and serves only to perform the tasks of observation and reporting on or in a licensed premise or designated area.
3. A holder of a temporary license must wear the card at the breast of the outermost garment while on duty, and must wear an approved company uniform, unless uniform exempt. Uniform exempt security officers must have the card in their possession.
4. Security personnel who are arrested shall notify the Private Security Division of the Jefferson County Sheriff's Office within twenty-four (24) hours of his/her arrest or if he/she has been taken into custody within twenty-four (24) hours from release of custody.

I have read this statement of temporary license regulations and I understand my authority while performing my job tasks as a security officer is limited by these regulations. I understand my authority as a security officer will remain limited until such time as I have completed the required security officer training and until such time as I have received a non-temporary security license from the Private Security Division of the Jefferson County Sheriff's Office. I will abide by these regulations.
